

Here's what's being said about Continuing Healthcare of Shadyside...

“
Dear Staff,

I want to thank you all for getting me back on my feet even though I'm still using a walker and will be for a while. I am up and moving with your help. I'm still getting physical therapy to my right wrist and that is almost over. I will continue therapy on my own. It is better, but has a way to go to be truly usable and your team has taught me some good therapy to use on it.

Each group did their job and their best...from the office staff, to the kitchen staff who worked hard to find something I would like to eat. To the nursing staff and everyone else who cared and helped me and my family ...thank you all! You all do your jobs for those who need your help and faith.

You may not get thanked often, but you will always have mine. I'm proud to tell people what you did for me and how I've improved. It's always good work. Thank you again!”

- Ethel Kloss
