

- On-going specialized training
- **Transitions** Unit managed by Dr. Rangwani, MD
- Accommodation of behaviors to promote independence in a safe environment

This new behavior unit is designed to offer a secure environment and specialized services while caring for individuals struggling with behavioral and psychological diagnosis. Our goal is to deliver care and services with patience and innovation through effective communication with residents, families and caregivers. Staff members receive additional training in communication and behavior management skills , as well as techniques to help provide a consistent approach to care. Our approach is thoughtful, consistent and centered around individual needs.
